

Bring home the Philips Portable Floor Console Air Purifier and save your family from respiratory problems.

This air purifier also displays indoor air quality, thanks to the Aerasense technology. The indoor air quality is displayed using PM2.5 as an indicator.

Even microscopic allergens, as small as 0.02 micro metre (more than 100 times smaller than PM2.5), that dwell in your surroundings are removed with the VitaShield IPS technology. VitaShield removes about 99.97 percent of the common airborne allergens.
