

MIRACL is an innovative group of cryptographers, programmers, and entrepreneurs who help digital businesses secure their future. Named after our software library that is regarded as the gold standard for elliptic curve cryptography (Multiprecision Integer and Rational Arithmetic C/C++ Library) MIRACL removes roadblocks to unleash limitless connections between users, cloud applications, and the Internet of Things.

MIRACL secures the people, apps and things needed to run a digital business. We eliminate the need for outdated security in your infrastructure, including passwords, root keys and stored credentials. Our single security platform enables billions of digital transactions to be unleashed while ensuring the integrity of every person, device, or component on tomorrow's web.
