

Our long term goal is to build machines that exceed human intelligence. We do fundamental scientific research into the nature of intelligence, seeking real breakthroughs rather than just incremental improvements. We are passionate about changing the world and are looking for exceptional people to join us in that mission.

Vicarious is proud to be an equal opportunity employer. We're committed to fair hiring practices and a welcoming working environment. All candidates are considered for employment without regard to race, religion, ethnicity, age, gender, sexual identity or expression, medical condition, or socioeconomic status. We value our differences and we're excited to learn what you can add to our team.

At Vicarious you will have the chance to work on the most important problems in the field with a team who will challenge and support you. Intellectual curiosity, egolessness, and passion are at the core of our culture.
