

Recombine is a clinical genetic testing company that facilitates informed medical decisions for patients and providers through innovative products and collaborative research. Our products are built on cutting-edge technologies, and our company is driven by experts in diverse fields who share a vision of a world where the power of personalized genomics is fully harnessed. Recombine's affordable tests and in-depth genetic counseling services deliver valuable insights to thousands of patients worldwide through our robust network of respected physicians. We leverage the power of big data to achieve new perspectives on the science and delivery of genetics in the realm of fertility and beyond. We are strongly committed to being your partner in genomics as we pursue innovative genetic approaches to improving health outcomes.
